

Fencing & Gating

~ Facilities Department ~

Objectives

- Provide General Safety and Security at each campus
- Better control of pedestrian access to campus
- Provide staff ability to secure classrooms during a lockdown
- Slow the entrance of intruder
- Allow school staff time to call first responder
- Secure campus buildings during non-school hours to prevent vandalism

Objectives:

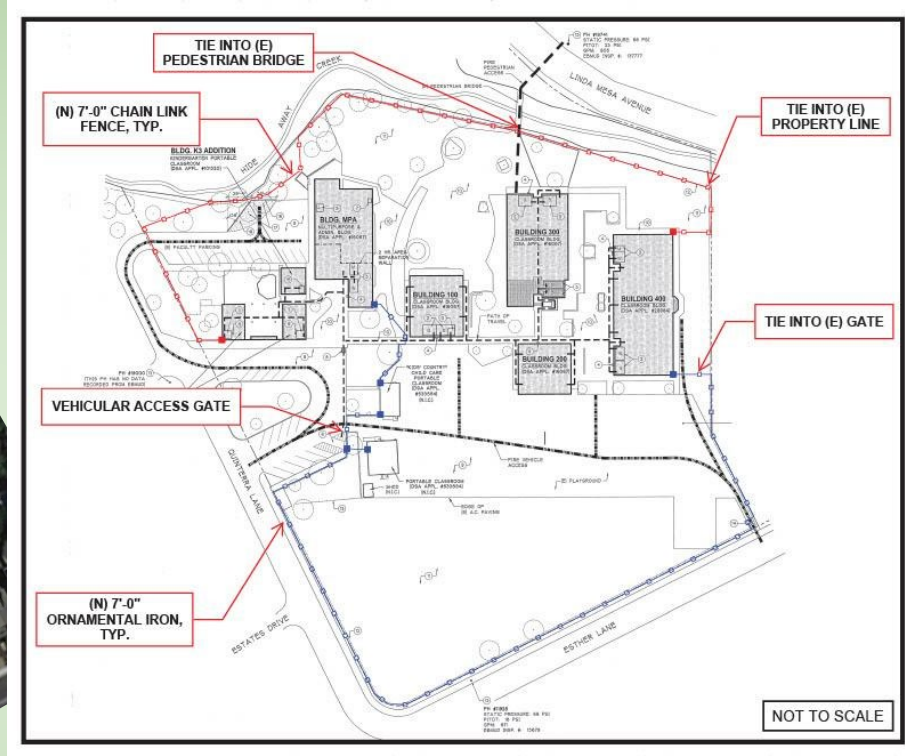

- 1) Have all classrooms capable of locking out intruders (from inside their classrooms)**
- 2) Slow down all unwanted/unauthorized intrusion and/or flow through campus**
- 3) Harden the perimeters – beginning with the inner perimeter fencing/gating**
- 4) After inner perimeter improvements have been made, we can then move to outer and property perimeters**

Considerations in Campus Fencing Plan

General Overview

- Review perimeter of campus and existing fencing
- Fence around inner core classrooms
- Identify current pedestrian and vehicle gates for access
- Evaluate proximity to neighbors & use neighbor fencing as our perimeter
- Identify overlap of uses with our partners at City of San Ramon and Town of Danville
- Consider community access to the school site
- Pedestrian gates need to be locked at start of day and unlocked at end of day

- Existing Perimeter Fence
- Existing Gates and Fencing
- Tier 1 Gates and Fencing
- 0 Location of Admin Office
