Education of Educators. Some seem very qualified to teach and some seem like they have no idea on how to teach the information.

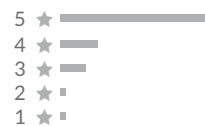

Presentation is key for retaining information, you can make it fun, add your personality or make a lecture. All work, but the quality of work matters

Flexible seating It promotes productivity and comforting

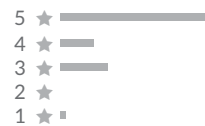

For all teachers to respect their students ethnicity, sexuality, gender, etc to the farthest extent. This is important because it treats the students with respect and shows them that they are valued.

Friends in classes I think we should be able to pick/have at-least one or two friends in each class, its no fun to have class with no friends.

Give more funding to teachers and their classrooms. That way teachers can utilize funds to teach more effectively, taking pressure off and making the learning experience more enjoyable.

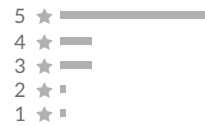

Have a brunch break. It allows students to have a break between learning.

Have a reward for doing well, let us work out doors and in hallways. A reward for doing well makes it so the students are actually trying a gives them a goal.

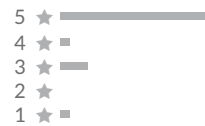

Have fresh and some healthy but also good food It's important because some students may not like the meal and so they choose not to eat it, this results in lack of paying attention in class.

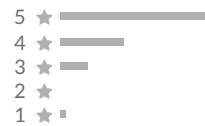

Have good lunches because I am usually always hungry during the afternoon

Having longer breaks. Making school start later.

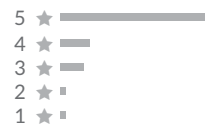

Having a safe environment and to have more encouraging teachers. I feel its important because it can affect a child's grades or desire to learn. Having encouraging teachers spreads positivity and will.

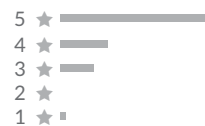

Having breaks during long block days. When it is a long block day, it is hard for my brain to focus because I haven't had a break but, having a break will help my brain refocus.

Having decent teachers We need to be taught

Having fun in classes so that you can have fun and learn at the same time. Because if you are bored and tired of learning, you will not learn and not study. If you are having fun, that means that you can study and learn.

Having more independent work time in class. So we can ask questions to the teacher if we do and we can complete homework assignments so we have less to do at home.

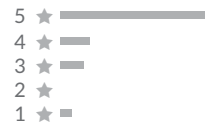

Having more visual examples. It helps us pay attention and makes instructions and activities more interactive. You can read the text, and be able to understand more deeply.

I would enjoy being given longer passing periods. This would give students more time to get from class to class and also reduce stress because they will not need to rush everywhere.
